

Beachside Town

Design Document

Overview

Project Purpose

This 3D environment will be a part of an VR- or web-based design and visualization application called "Faces and Places." In this experience, the user can configure small environments using modular assets, including local residents of that environment. The environments can be viewed during the day or night. This particular environment is a preconfigured beachside town inspired by the city of Brighton, England, where one of Unity's offices is located.

Target Audience

This experience is targeted at users who enjoy:

- Peaceful exploration games like [Lost Ember](#)
- VR design apps like [Tilt Brush](#)
- Simulation or building games like [SimCity](#)
