

# Alien Video Game Shop

## Design Document

### Overview

#### Project Purpose

This 3D environment will be a part of an interactive animated series called "Alien Counter Encounters." In this experience, the player travels around the universe, encountering aliens of different cultures at various counters. In this scene, the user can interact with a four-armed alien clerk at a video game shop, where they will be able to wander the aisles, and browse through video games of a far-off galaxy.

#### Target Audience

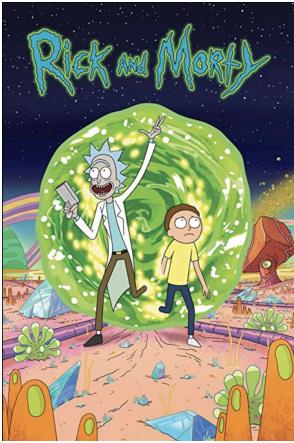

This experience is targeted at users who enjoy:

- Point and click, narrative-driven adventure games like [Tales of Monkey Island](#)
- Narrative puzzle-based games like [Myst](#)
- Simulation role playing games like [Stardew Valley](#)

#### Concept art
